

ESB-1616 ELECTRONIC CASH DRAWER:

RISCO Products Incorporated is a world-class manufacturer of manual and electronic cash drawers. One of RISCO's quality products is the compact, yet powerful ESB-1616 electronic cash drawer. The ESB-1616 requires one of the smallest footprints in the POS marketplace, yet it contains enough interior room to house a typical 5 bill, 5 coin money tray. The ESB-1616 model cash drawer utilizes a bottom mount, linear ball-bearing slide platform that provides long life and superior load capacity for heavy duty applications. The ESB cash drawer has been lab tested in excess of 2 million cycles which ensure years of trouble-free service in harsh POS applications.

Construction: Powder-coated steel case and drawer front.

Suspension: Bottom-mounted, $\frac{3}{4}$ extension linear bearing slides.

Color: Pearl White is standard.

Size: 16.0" Long x 16.0" Wide x 4.0" High

Tray: TP-55F tray is standard -- 5 *fixed* currency compartments; 5 *fixed* coin tills; constructed of high impact plastic; tray is removable; locking cover is *not* included.

Lock: 3 position, 4 function, tubular key lock.

Interface: 24V DVO interface is standard. Signal Opening interface, Serial Interface or Parallel interfaces are available.

Cable: A wide selection of detachable cables is available and can be purchased separately (contact RISCO Products Inc. for additional information).

Features: Dual medial slots, under tray storage, drawer status monitoring, drawer lock can be specified as keyed alike, keyed different, or keyed random.

ESB-1616 SERIES

ESB-POS SERIES ELECTRONIC CASH DRAWER:

RISCO Products Incorporated is a world-class manufacturer of manual and electronic cash drawers. RISCO's ESB-POS models offer special cable routing cut-outs to help hide cables for those POS applications that use a number of peripheral devices. The ESB-POS series of cash drawers includes the ESB-POS-2120 and the ESB-POS-211675. These cash drawers utilize a bottom mount, linear ball-bearing slide platform that provides long life and superior load capacity for heavy duty applications. The ESB-POS cash drawer has been lab tested in excess of 2 million cycles which ensure years of trouble-free service in harsh POS applications.

Construction: Powder-coated steel case and drawer front. Removable steel back.

Suspension: Bottom-mounted, $\frac{3}{4}$ extension linear bearing slides.

Color: Pearl White is standard.

Size: ESB-POS-2120: 21.0" L x 20.0" W x 4.375" H (dimensions shown include feet).

ESB-POS-211675: 21.0" L x 16.75" W x 4.375" H (dimensions shown include feet).

ESB-POS-1751675: 17.5" L x 16.75" W x 4.375" H (dimensions shown include feet).

ESB-POS-17520: 17.5" L x 20.0" W x 4.375" H (dimensions shown include feet).

Tray: TP-55F tray is standard -- 5 fixed currency compartments; 5 fixed coin tills; constructed of high impact plastic; tray is removable; locking cover is *not* included.

Lock: 3 position, 4 function, tubular key lock.

Interface: 24V DVO interface is standard. Signal Opening, Serial, or Parallel interfaces are available.

Cable: A wide selection of detachable cables is available and can be purchased separately (contact RISCO Products Inc. for additional information).

Features: Designed for use with our "POSDock" product line. Cutouts on top and bottom of drawer casing allow for ease in cable routing. This unit also has under-counter mounting capability. Dual medial slots, under tray storage, removable rear cover, and money tray with 5 coin tills and 5 currency compartments are included. Drawer lock can be specified as keyed alike, keyed different, or keyed random.

TC-500 TRAY CABINET

TDM-100 MANUAL CASH DRAWER:

RISCO Products Incorporated is a world-class manufacturer of manual and electronic cash drawers. Our TDM-100 manual cash drawer offers under-counter mounting and a uniquely designed alarm system that alerts one to unauthorized use of the cash drawer. The drawer uses the Tucker alarm mechanism to sound a bell if an unauthorized person tries to gain entry into the drawer. The Tucker alarm system is a 5 finger pull mechanism that can be set to a variety of combinations. The bell will not ring when the correct combination is used to open the drawer. The bell does sound however when the finger pulls are not correctly applied, thus providing a warning that someone is attempting to open the drawer. The drawer also locks automatically if the wrong combination is entered. This all steel drawer incorporates a full extension, linear ballbearing, suspension system, a durable powder coat finish, and a warning bell. A removable, 5 bill-5 coin money tray offers ample storage for both coin and currency. This unit comes with a 1 year limited warranty.

Construction: Powder-coated steel case and drawer.

Suspension: Side mounted, full extension, linear ball-bearing, suspension system.

Color: Carbide Black textured powder coat finish.

Size: 16.875" Wide x 17.5" Long x 3.875" High

Tray: TP-55F tray is standard -- 5 *fixed* currency compartments; 5 *fixed* coin tills; constructed of high impact plastic; tray is removable; locking cover is standard.

Lock: Equipped with the Tucker Alarm finger-pull combination lock. This device permits any of 32 easily changed lock combinations to be used to open the drawer. The warning bell sounds when the finger pulls are incorrectly applied, and the drawer will not open. The bell remains silent when the combination is worked correctly.

Features: Combination lock system; warning bell; removable money tray.

TDM-100 CASH DRAWER
